

***** PLEASE READ THE IMPORTANT EMAIL BELOW*****

PLEASE MAKE SURE YOU FOLLOW THE INSTRUCTIONS CORRECTLY

Dear HS Students,

As we prepare for the coming of MAP testing, make sure that:

- Your laptops are fully charged and don't forget to bring your charger.
- The latest version of the LockDown Browser "Software" is installed on your laptops and works properly.

To download the software, you might use one of the following links:

- [For MAC operating system](#)
- [For Windows operating system](#)

System Requirements:

Device	Operating System
Windows® PC	Windows 7, 8.1, or 10
Macintosh®	Mac OS® X v10.12 to 10.14
iPad®	iOS 11 to 12
Chromebook™	Google Chrome™ OS 65 or higher

As a best practice, you should create a dedicated computer user account for use during MAP Growth testing and apply the following account settings:

- Disable virus and malware scanners because they can interfere with testing
- Prevent screen savers because they can interfere with testing
- Disable automatic updates to software and the operating system
- Disable system notifications such as email alerts
- Extend the time for power-saving sleep mode to at least 30 minutes
- Disable any pop-up blocker software tools
- Disable assistants like Siri and Cortana, as well as voice dictation

Best Regards
